**ALICO**  
EXPORT - IMPORT

We are a private export-import company established in 1991 dealing more than 20 years in a business of abrasives of all kinds as well as other hardware items.

We are specialized in the export of Czech coated and bonded abrasives as well as abrasive grains exporting to many countries of the world, especially to Middle and Far East, South America, Europe etc.

Beside our main abrasive program we supply hand tools, saws, saw blades, hinges, wire brushes, paint brushes, scrapers, rollers and other hardware products. We complete the goods from various factories into one consignment saving the importers time and additional costs.

We export the goods of the pure Czech origin only that are produced in accordance with European quality standards.
